- * 6 Markdown policies data/ (ingests)
- * Retrieves most relevant customer question
- * Answer from knowledge base
- * Declines gracefully

[Answer → string , sources → returned.md]

Insights:-

- The KB is tiny
- The guardrail (refused)
- There are natural adjacent - topic traps in the data
- llam.py (live API key)
- Determinism matters for a demo
- "Grounded" is under-specified on purpose
